The Whales have arrived in the Whitsundays.

Did you know that a Humpback Whale mother feeds the baby Milk which is a similar consistency to Cottage Cheese... it is full of fat which helps the baby grow quickly.

Each year the Humpback Whales visit for July, August and September.

While they are in the Whitsunday's the mothers have their young and commence the fattening up process ready for the migration South in October.

While we do not go Whale watching, the whales are plentiful and they are curious, so it is pretty normal for our guests to have the Whales breaching and putting on displays at close range. Maybe see Migaloo the White Whale!

Regular maintenance is a major reason why our customers rave about the quality of our tours. In 2009 we have done extensive work to Hammer, Broomstick, Boomerang and British Defender. **Photos show interiors of Maxi Yachts Boomerang & Broomstick (right)**
