Tornado Dive

Tornado Dive is a Rendezvous Dive Company which does Introductory or Certified Dives. Diving is performed from a 58ft Motor Boat which has been customized as a Dive Platform. A Dive team live on Tornado Dive, anchored around the fringing coral reefs which extend from the edge of the Whitsunday Islands.

Guests on holidays in the Whitsunday's, can easily experience a Dive on the Coral Reefs. We cater to guests from:

- Chartered Bareboats;
- Crewed Live-aboard yachts;
- Private Vessels;
- Day Tours from Airlie Beach on Whitsunday Bullet.

Why Dive the Whitsundays ?

The Whitsundays is blessed with having many bays and coves which are well protected from prevailing winds and large ocean swells or waves. This protection helps to foster the growth of many soft corals, such as the Coral Fans. These vivid soft corals attract many species of colourful fish.

How long is a Dive & what is involved ?

For Introductory Divers it will take around 90 minutes from when the guests arrive at Tornado Dive. The process includes, a Health and Dive Medical questionnaire, then a safety and information briefing from a member of the Dive Team. Then it's time to kit up, do practice on the purpose built Dive Platform and finally it's off for a 25 to 30 minute fully guided Scuba Dive. Most dives will be to a maximum depth of 8 metres.

Certified Divers, must present a valid Dive Card, have a briefing with a member of the team, kit up and enjoy a guided dive for at least 30 minutes.

Where and when to Dive ?

Contact Tornado Dive at least 24 hours before diving to arrange a rendezvous location and time. Dive locations vary based on the prevailing winds, tides and general conditions, including visibility.

Guests with some Medical Conditions may not be able to Dive. If unsure, see a Doctor who can give you a dive clearance medical examination.
